

HYDRO-MAT

- The perfect way to manage your water resources
- Using sub-surface implementation, you limit surface water evaporation during irrigation
- Now you water once or twice a week during the hot season
- These mats can be customized to your specific needs
- Ask how we can help you get credits from your water provider

HYDRO-PANEL

- The scientific way to drain humidity from mechanical rooms, minimizing the ability of airborne maladies to breed

HYDRO-ENVELOPE

- The way to encapsulate the roots of all your plants or trees and create a life-giving envelope of water without the constant irrigation cycles

HYDRO-GRANULES

- This system, when applied to your already planted turf will increase the efficiency of your irrigation cycles
- Hydro-Granules can be incorporated to your already existing lawn in a manner you are already accustomed to - it's simple as applying fertilizer to your lawn. The pellets are broadcast along with the fertilizer to achieve maximum water efficiency.
- For maximum application, maximum product performance install with Soil.
